SUMMARY

Assistant IT Manager with 5+ years of hands-on experience managing enterprise IT infrastructure, Windows Server environments, virtualization platforms, and network systems. Proven expertise in Hyper-V virtualization, Active Directory, firewall and switch configuration, backup and disaster recovery, and IT monitoring tools. Strong background in supporting production environments, resolving incidents, and maintaining high system availability. Actively maintains a production-grade homelab focused on virtualization, automation, monitoring, and infrastructure optimization.

SKILLS

- Build Home Lab from scratch.
- In house backup system. (Nextcloud)
- DNS ad-blocker server (Adguard, Pihole)
- Hyper-V and proxmox VM configuration.
- NAS backup configuration. (QNAP/TrueNAS)
- Hands on experience with networking and router configuration.
- Networking skills.
- Team leading skills.
- Knowledge in computer Hardware.
- Knowledge in Windows Operating System.
- Hands on experience in Linux Operating Systems. (Client and Server)
- Knowledge in Cisco Packet tracer.
- Basic Knowledge in Arduino based Systems.

ADDITIONAL INFORMATION

- Strong hands-on experience through production systems and personal homelab environments
- Comfortable working with on-premise infrastructure, virtualization, and hybrid environments
- Willing to learn new technologies and adapt to evolving IT environments

EDUCATION

BCAS Campus Wellawatta

HND in Computer Science and
Network Engineering 2020-2021

St' Anthony's Collage Wattala

G.C.E (O/L) (2016 Index - 60468718)

G.C.E.(A/L) (2019 index - 5363594)

EXTRA CURRICULUM ACTIVITIES

- Participated to National Cadet Corps Annual Training Camp - (2014) (2015)
- Participated to the Presidential Guard of Honour to Hon. Maithripala Sirisena at Bandaranayake Collage - (2014)

PROFESSIONAL EXPERIENCE

Paradise Toys (PVT) ltd

2024 April - Up to today - Assistant IT Manager

- Microsoft 365 Administration
- ManageEngine administration
- Hyper-V Cluster management
- Microsoft Dynamics NAV management
- MailStore mail backup system
- SQL server configuration, Backup and restore
- Aruba switch and admin portal
- Unifi switch, Access points and admin portal

2023 September - 2024 April: - IT Executive

- Firewall configuration.
- Hyper-V VM configuration.
- Windows Server installation and setup.
- ManageEngine Monitoring system Configuration.
- Adobe creative cloud support
- Konica Bizhub products repairer and support
- NAS backup configuration. (QNAP)

2021 August- 2023 September: - IT Assistant

- Domain network configuration.
- UPS management
- Remote IT consulting and remote support.
- Computer troubleshooting and repair.
- Hands on experience with networking and router configuration.
- Wireless access point management

Cloud nine Sri Lanka

2022 March - Up to today :- Remote Support Engineer

- Technical Support
- Remote Administration
- Remote Desktop
- Point of Sale (POS) Systems
- QuickBooks

PERSONAL PROJECTS

Needle Management System - Full-Stack Web Application

- Designed, developed, and deployed a complete, enterprise-level web application from scratch using ASP.NET Core MVC, C#, and Entity Framework Core.
- Engineered the back-end SQL Server database, creating a relational schema to manage complex data including users, multi-level inventory, departments, and machine-to-needle compatibility. This expands on my professional experience with SQL backup and restore.
- Built a secure, role-based user management system with ASP.NET Core Identity, creating a complex workflow for departmental requests, manager approvals, and stores fulfilment.
- Developed a dynamic and interactive user interface with JavaScript, AJAX, and modern libraries (Chart.js, Select2) to create a real-time reporting dashboard and user-friendly forms with features like live webcam capture.
- Managed the complete end-to-end deployment to a Windows Server with IIS, including database migration, production configuration, and enabling HTTPS with SSL certificates. This demonstrates a practical application of my core skills in server and infrastructure management.

PC Inventory Management System (Web-based Project)

- Designed and developed a full-stack web application to manage office PC inventory using HTML, CSS, JavaScript, PHP, and MySQL.
- Implemented CRUD functionality (Create, Read, Update, Delete) to add, edit, and manage PC details such as hardware specifications, software, and user assignments.
- Integrated search and filtering options by department for efficient data retrieval.
- Developed CSV export functionality for reporting and backup purposes.
- Followed modern UI design principles to create a simple, user-friendly interface.

Web-Based Inventory Management System (Web-based Project)

- Developed a full-stack web application using PHP, MySQL, HTML, CSS, and JavaScript hosted on WAMP Server.
- Implemented user authentication with role-based access control (Admins can add/issue items, Users can only view charts).
- Designed and integrated interactive charts using Chart.js to visualize inventory levels dynamically.
- Built functions to add, update, and issue items, with real-time chart updates after changes.
- Followed best practices by separating front-end styling (CSS) and JavaScript logic, ensuring clean and maintainable code.
